CHEEDELLA SIVA SAI JAHNAVI
React and Generative AI Developer

Email: cheedellajahnavi@gmail.com | **Phone:** +91-7981064354 | **Location:** Hyderabad | Open to Relocate
LinkedIn | Porfolio | Github

React Developer and Generative AI Enthusiast with hands-on experience building high-performance, responsive web applications across devices. Worked on **MERN stack** projects and currently focused on developing **Generative AI-driven** solutions and intelligent automation workflows that deliver measurable business impact.

Technical Skills

- **Frontend**: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Redux Toolkit (RTK), REST APIs (integration & consumption), Material UI
- **Backend / Full Stack:** Node.js, Express.js, MongoDB
- **AI/ML:** Python, NumPy, Pandas, PyTorch, NLP, LangChain, Generative AI, RAG (Retrieval- Augmented Generation), Prompt & Context Engineering
- **Other Tools/ DevOps**: GitHub, Linux, Label Studio, Cursor IDE

Experience

React & Generative AI Developer / TrueID, Hyderabad
October 2024 – present

- **Delivered** 6+ web applications with React, TypeScript & Redux(RTK), maintaining **99.9% uptime and boosting UI performance by 30%** by applying clean architecture.
- **Deployed** Redux Toolkit (RTK) for state management, enforced TypeScript, resulting in **zero runtime errors** and easy scalability for a team of 7 developers.
- **Championed** UI/UX improvements using modern design patterns, reducing user complaints by **40%** and powering faster page loads.
- **Designed** intelligent automation workflows using Generative AI technologies and cutting manual workflow time by **50%.**
- **Enhanced** automation project accuracywith strategic Prompt and Context Engineering, increasing correct outputs by **35%.**
- **Integrated** 6 RESTful APIs and 5 third-party libraries and **accelerating feature delivery by 25%** and directly boosting client adoption rates.

React.js Intern / TrueID, Hyderabad

JULY 2024 – SEPTEMBER 2024

- **Created** 10+ reusable React components, using modern hooks to improve code library efficiency and reduce UI development time by **20%.**
- **Facilitated** Agile sprints for a team of 5, leading to a **30% improvement in release velocity** and streamlined code review cycles.

UI Developer Intern / BVM Consultancy Services, Hyderabad

JUNE 2024 – JULY 2024

- **Produced** 2 pixel-perfect static websites applying semantic HTML5/CSS3 and mobile-responsive design, resulting in **96% mobile test pass rate**.
- **Mastered** web development fundamentals, including box model, positioning, and media queries.

Projects

Mind Vault | Full stack + AI

Technologies: React.js, Redux Toolkit, Python, FastAPI, Chroma DB, Gemini API

- Built a full-stack RAG-powered knowledge base using FastAPI, React.js and ChromaDB with semantic search and AI-generated answers via Gemini API.
- Implemented end-to-end ingestion pipeline - chunking, embedding, and vector storage - returning cited source snippets with every AI response.

Image Labs | Full stack

Technologies: React.js, Python, PostgreSQL, Firebase

- Developed a production-grade portal to verify real vs AI-generated images with real-time backend updates.
- Scaled to support 600+ daily verifications, ensuring reliability and responsive UI performance.

RAG Q&A Chatbot | Full Stack

Technologies: React.js, Python, Flask, LangChain, FAISS, HuggingFace, Prompt Engineering

- Implemented a Retrieval-Augmented Generation chatbot to answer queries from documents, URLs, and databases.
- Achieved 98% accuracy across user Q&A sessions through effective prompt and context engineering.

AI Image Generator | Generative AI

Technologies: React.js, Node.js, Express, Google Gemini API, Prompt Engineering

- Built a text-to-image generation application using Generative AI models and optimized prompts.
- Ensured reliable image generation and a smooth, user-friendly frontend experience.

E-Commerce web Application | Full Stack (MERN)

Technologies: React.js, Redux Toolkit(RTK), Node.js, Express, MongoDB, Socket.io

- Developed a secure e-commerce platform with authentication, product catalog, cart, and real-time inventory updates.
- Reduced stock mismatch errors by 60% and maintained 99.5% API uptime.

AI Research & Report Agent | Full stack

Technologies: React.js, Redux Toolkit, FastAPI, Python, LLM APIs

- Built an AI-powered research agent supporting topic-based multi-query searches with structured summaries and source attribution.
- Designed for reliability under real-world constraints such as API failures and network latency.

Enterprise Frontend Systems (Merged Projects) | Frontend

Technologies: React.js, TypeScript, Redux Toolkit(RTK), Material UI

- Built and optimized multiple enterprise portals (Identity Management, Adjudication, Acquiring, Clustering) using modular React architecture.
- Reduced navigation time by 50%, code redundancy by 40%, and improved user engagement by 30% through reusable components and optimized state management.

AI Vision & Computer Vision Systems | AI/ML

Technologies: Python, YOLO, Label Studio, E2ENetworks TIR, Linux, AWS GPU

- Worked with Custom Object Training and Segmentation for Drone Imagery Using YOLO Model by Trained YOLOv11x models for complex segmentation tasks to detect objects like buildings, roads, and vehicles.
- Trained and evaluated an AI model to detect real vs AI-generated faces, including deepfakes, morphs, and face swaps. Achieved 97% testing accuracy using GPU-based training and inference on AWS across diverse datasets.

Education:

Bachelor of Technology (B.Tech) - **CGPA: 8.0/10.0**
Prakasam Engineering College
September 2020 - May 2024
