SUMMARY

Full-Stack and Generative AI Engineer skilled in building scalable web applications using React.js, Node.js, Python, PostgreSQL, and REST APIs. Experienced in developing enterprise applications, analytics dashboards, and AI-powered solutions using Retrieval-Augmented Generation (RAG), LLM integrations, vector databases, and prompt engineering. Strong background in frontend development, backend services, database optimization, workflow automation, and end-to-end application development.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript, TypeScript, Redux Toolkit, Material UI, HTML5, CSS3

Backend: Node.js, Express.js, FastAPI, REST APIs

Generative AI: Python, Generative AI, Retrieval-Augmented Generation (RAG), LangChain, Prompt Engineering, LLM Integration, Vector Search, Semantic Search

Databases: PostgreSQL, MongoDB, Oracle Database, ChromaDB

Tools and Platforms: Git, GitHub, Linux, Firebase

EXPERIENCE

Full-Stack and Generative AI Engineer <i>TrueID</i>	Oct 2024 – Present <i>Hyderabad, India</i>
- Developed and maintained enterprise platforms including Identity Management Dashboards, Image Labs and Enterprise Business Applications, supporting business-critical workflows. - Built interactive analytics dashboards using React.js, TypeScript, Redux Toolkit, Material UI, and ApexCharts with real-time reporting and data visualization capabilities. - Designed and implemented RESTful APIs and backend services using Node.js, PostgreSQL, and Oracle Database, enabling seamless integration across multiple business systems. - Developed AI-powered workflow automation solutions using Python, Retrieval-Augmented Generation (RAG), prompt engineering, and LLM integrations. - Optimized PostgreSQL and Oracle SQL queries and collaborated with Agile teams to deliver production-ready features, enhancements, and bug fixes.	
React.js Intern <i>TrueID</i>	Jul 2024 – Oct 2024 <i>Hyderabad, India</i>
- Developed reusable React components and integrated REST APIs for dynamic data rendering. - Implemented Redux Toolkit for scalable state management and improved maintainability. - Optimized frontend performance and responsiveness to enhance user experience.	
UI Developer Intern <i>BVM IT Consulting Services</i>	Jun 2024 – Jul 2024 <i>Hyderabad, India</i>
- Developed responsive web interfaces using HTML5, CSS3, JavaScript, Flexbox, and CSS Grid. - Ensured cross-browser compatibility and mobile responsiveness across multiple devices. - Improved UI quality through semantic HTML and accessibility-focused development practices.	

PROJECTS

Identity Management Dashboard

Technologies: React.js, Material UI (MUI), ApexCharts, Node.js, REST APIs

- Developed reusable dashboard components with dynamic filtering and API-driven analytics.
- Implemented real-time reporting and visualization features using ApexCharts.

Real-Time Messaging Platform

Technologies: React.js, Node.js, Express.js, PostgreSQL, Socket.io, JWT, Material UI

- Developed a full-stack real-time messaging platform using React.js, Node.js, and Socket.io, featuring sub-100ms message delivery and live presence tracking across concurrent user sessions.
- Implemented persistent chat history leveraging PostgreSQL and secured the application with JWT-based authentication and React Context API for seamless session and token management.

Image Labs

Technologies: React.js, Python, PostgreSQL, Firebase

- Developed a production-grade portal to verify real vs AI-generated images with real-time backend updates.
- Scaled to support 600+ daily verifications, ensuring reliability and responsive UI performance.

Mind Vault: RAG-Powered Knowledge Base

Technologies: React.js, Redux Toolkit, Python, FastAPI, Chroma DB, Gemini API

- Built a full-stack RAG-powered knowledge platform enabling semantic search and AI-generated responses with source citations.
- Implemented end-to-end ingestion pipeline - chunking, embedding, and vector storage - returning cited source snippets with every AI response.

E-Commerce web Application

Technologies: React.js, Redux Toolkit(RTK), Node.js, Express, MongoDB, Socket.io

- Developed a secure e-commerce platform with authentication, product catalog, cart, and real-time inventory updates.
- Implemented backend APIs and real-time features to ensure data consistency and system reliability.

Enterprise Business Applications

Technologies: React.js, TypeScript, Redux Toolkit(RTK), Material UI

- Contributed to the development and maintenance of Identity Management, Adjudication, Acquiring, and Clustering applications using React.js and TypeScript.
- Built reusable UI components and implemented centralized state management using Redux Toolkit, improving maintainability and consistency across applications.
- Integrated REST APIs to enable seamless data exchange between frontend and backend systems.

AI Vision and Computer Vision System

Technologies: Python, YOLO, Label Studio, E2ENetworks TIR, Linux, AWS GPU

- Trained YOLO-based computer vision models for drone imagery segmentation and object detection.
- Developed AI-generated image and deepfake detection models achieving high validation accuracy.

EDUCATION

Prakasam Engineering College

B.Tech in Computer Science and Engineering

Kandukur, Andhra Pradesh

2020-2024
